Introduction

There are fundamentally two different types of exchange the ones that deal with fiat currency, and the ones that deal with cryptocurrencies.

Almost all cryptocurrencies are decentralized networks based on blockchain technology. These digital currencies are not issued by any central authority, making them impossible to manipulate by the government.

What is ZEDEK?

Zedek (ZDK) is a BEP-20 Token built on the Binance Smart Chain network, designed as a multi-utility asset with a focus on store of value, exchange, and charity. As a store of value, ZDK offers holders the potential for long-term appreciation and stability. Additionally, ZDK can be used for exchange purposes, facilitating transactions within the Binance Smart Chain ecosystem. Finally, ZDK incorporates a charitable aspect, with a portion of transaction fees being allocated to charitable causes. Overall, Zedek represents a versatile and socially responsible investment opportunity for individuals seeking exposure to the emerging world of blockchain and cryptocurrency.

TOKENOMICS

Token name: ZEDEK

Ticker: ZDK

Decimal: 9

Total supply: 700 Trillion tokens

Initial circulating supply: 693 Trillion tokens

Token burning: 2% is burnt per transaction reducing the overall supply and potentially increasing the value of the remaining tokens.

Token governance: ZEDEK holders will be renounced.

Token price: The price of ZEDEK may fluctuate based on market demand, token burning, and platform adoption.

What makes ZEDEK Unique

Zedek (ZDK) stands out from other BSC tokens due to its unique combination of features and characteristics.

Firstly,

ZDK serves as a multi-utility asset, providing holders with a diverse range of use cases such as store of value, exchange, and charity. This versatility sets ZDK apart from other tokens that may have a singular focus or limited use cases.

Secondly,

ZDK incorporates a charitable component, with a portion of transaction fees being allocated to charitable causes. This aspect of the token reflects a socially responsible and community-oriented approach to cryptocurrency investment, which is still relatively uncommon in the industry. Additionally, the use of token burning helps to mitigate inflationary pressures and potentially increase the value of remaining tokens.

Finally,

ZDK benefits from its association with the rapidly growing Binance Smart Chain ecosystem which provides a secure and efficient infrastructure for token transactions. .

UTILITY

VALUE STORAGE

As a store of value, ZDK offers holders the potential for long-term appreciation and stability.

EXCHANGE

ZDK can be used for exchange purposes, facilitating transactions within the Binance Smart Chain ecosystem..

Future Dev Plans

→ ZEDEK WALLET

Zedek Token is currently exploring the possibility of launching a BEP-20 wallet, which would provide users with a secure and efficient way to store, manage, and trade their Zedek Tokens. If the project goes ahead, the BEP-20 wallet will be built on the Binance Smart Chain, leveraging the latest in blockchain technology to ensure the safety and security of users' funds

→ ZEDEK EXCHANGE AND P2P

Zedek Token is planning to expand its offerings by launching both a centralized exchange and a peer-to-peer (P2P) trading platform.

The exchange will provide users with a secure and reliable platform to trade Zedek Tokens and other cryptocurrencies. It will feature advanced trading tools, competitive fees, and a user-friendly interface, making it easy for both novice and experienced traders to participate in the cryptocurrency market.

→ ZEDEK ECOMMERCE INTERGRATION

Zedek Token is planning to integrate its cryptocurrency into e-commerce platforms to enable users to buy goods and services online using Zedek Tokens. The e-commerce integration will enable users to transact with merchants who accept Zedek Tokens as a payment method. This will make it easier for users to buy goods and services without the need for traditional payment methods such as credit cards or bank transfers..

Conclusion

Zedek is a digital asset that functions as a store of value and a medium of exchange and charity and provides users with a secure and stable means of holding, protecting and disposing their assets at their will. Zedek's technology is based on blockchain and is a BEP-20 Token built on the Binance Smart Chain network, which ensures the security and transparency of transactions. the project was designed with an aim to give individuals opportunity to store value and exchange and in the process to give back to charity
